What's New In?

---

Download new versions of Cydia tweak TweakBox, and take full control over your App Store. A powerful tweak that allows you to manage all your applications in one place, where you can easily sort, search, rate, rate them, and do a lot more to get a full overview of all your downloaded and used apps! If you have a lot of information to manage on a daily basis, you're probably looking for an efficient solution to keep track of it and one of the best ways of

---

doing so is by turning to specialized apps. Ezlog4J is one of the applications that can help you manage data efficiently by letting you create text or voice memos quickly and without significant efforts. Create text and voice memos This program can help you take notes in an efficient way by letting you create text and voice memos. Therefore, you can save important bits of information on your computer in your favorite way, whether it's recording your voice or writing a piece of text.

---

You can even rank your notes on a scale from 1 to 5, according to their importance by simply selecting a number of stars whenever you're creating or editing a note. It is worth mentioning that in order for this utility to run on your computer, you must have Java Runtime Environment installed. Handy editing options When creating a note, you can type a subject and contents for the body of the note by using either plain text or HTML code, as the application

---

also offers you support for this feature. The sample note that is available in the main window when first launching the application serves as a model of how you can use HTML code to make your notes look more appealing. It is also possible that you can set a default subject for all of your notes by simply ticking the corresponding checkbox whenever you're in the Entry Editor window. Recording a voice note can also be performed from the same location by pressing the

---

"Record" button and the "Start" one after you've reached the recorder window. Import or export You can filter created notes by words or stars by choosing the right option from the "Filter" menu or hitting the appropriate combination of keys on your keyboard (ALT + W for the former, ALT + S for the latter). Additionally, the "Tools" section can help you import or export content from and to a bunch of formats including CSV and HTML. Notes can be deleted,

---

edited or cloned, depending on your needs. Handy Java-based note manager that supports voice recording All in all, Ezlog4J can help you take text or voice notes without significant efforts, just as long as you have Java installed on your computer. It comes with a simple interface, supports HTML code
